

# “PerpuSeru”

*Transforming Public Libraries to become ICT-Based  
Community Learning Centre to improve Quality of Life*

**Bersama Terbang Menembus Batas**

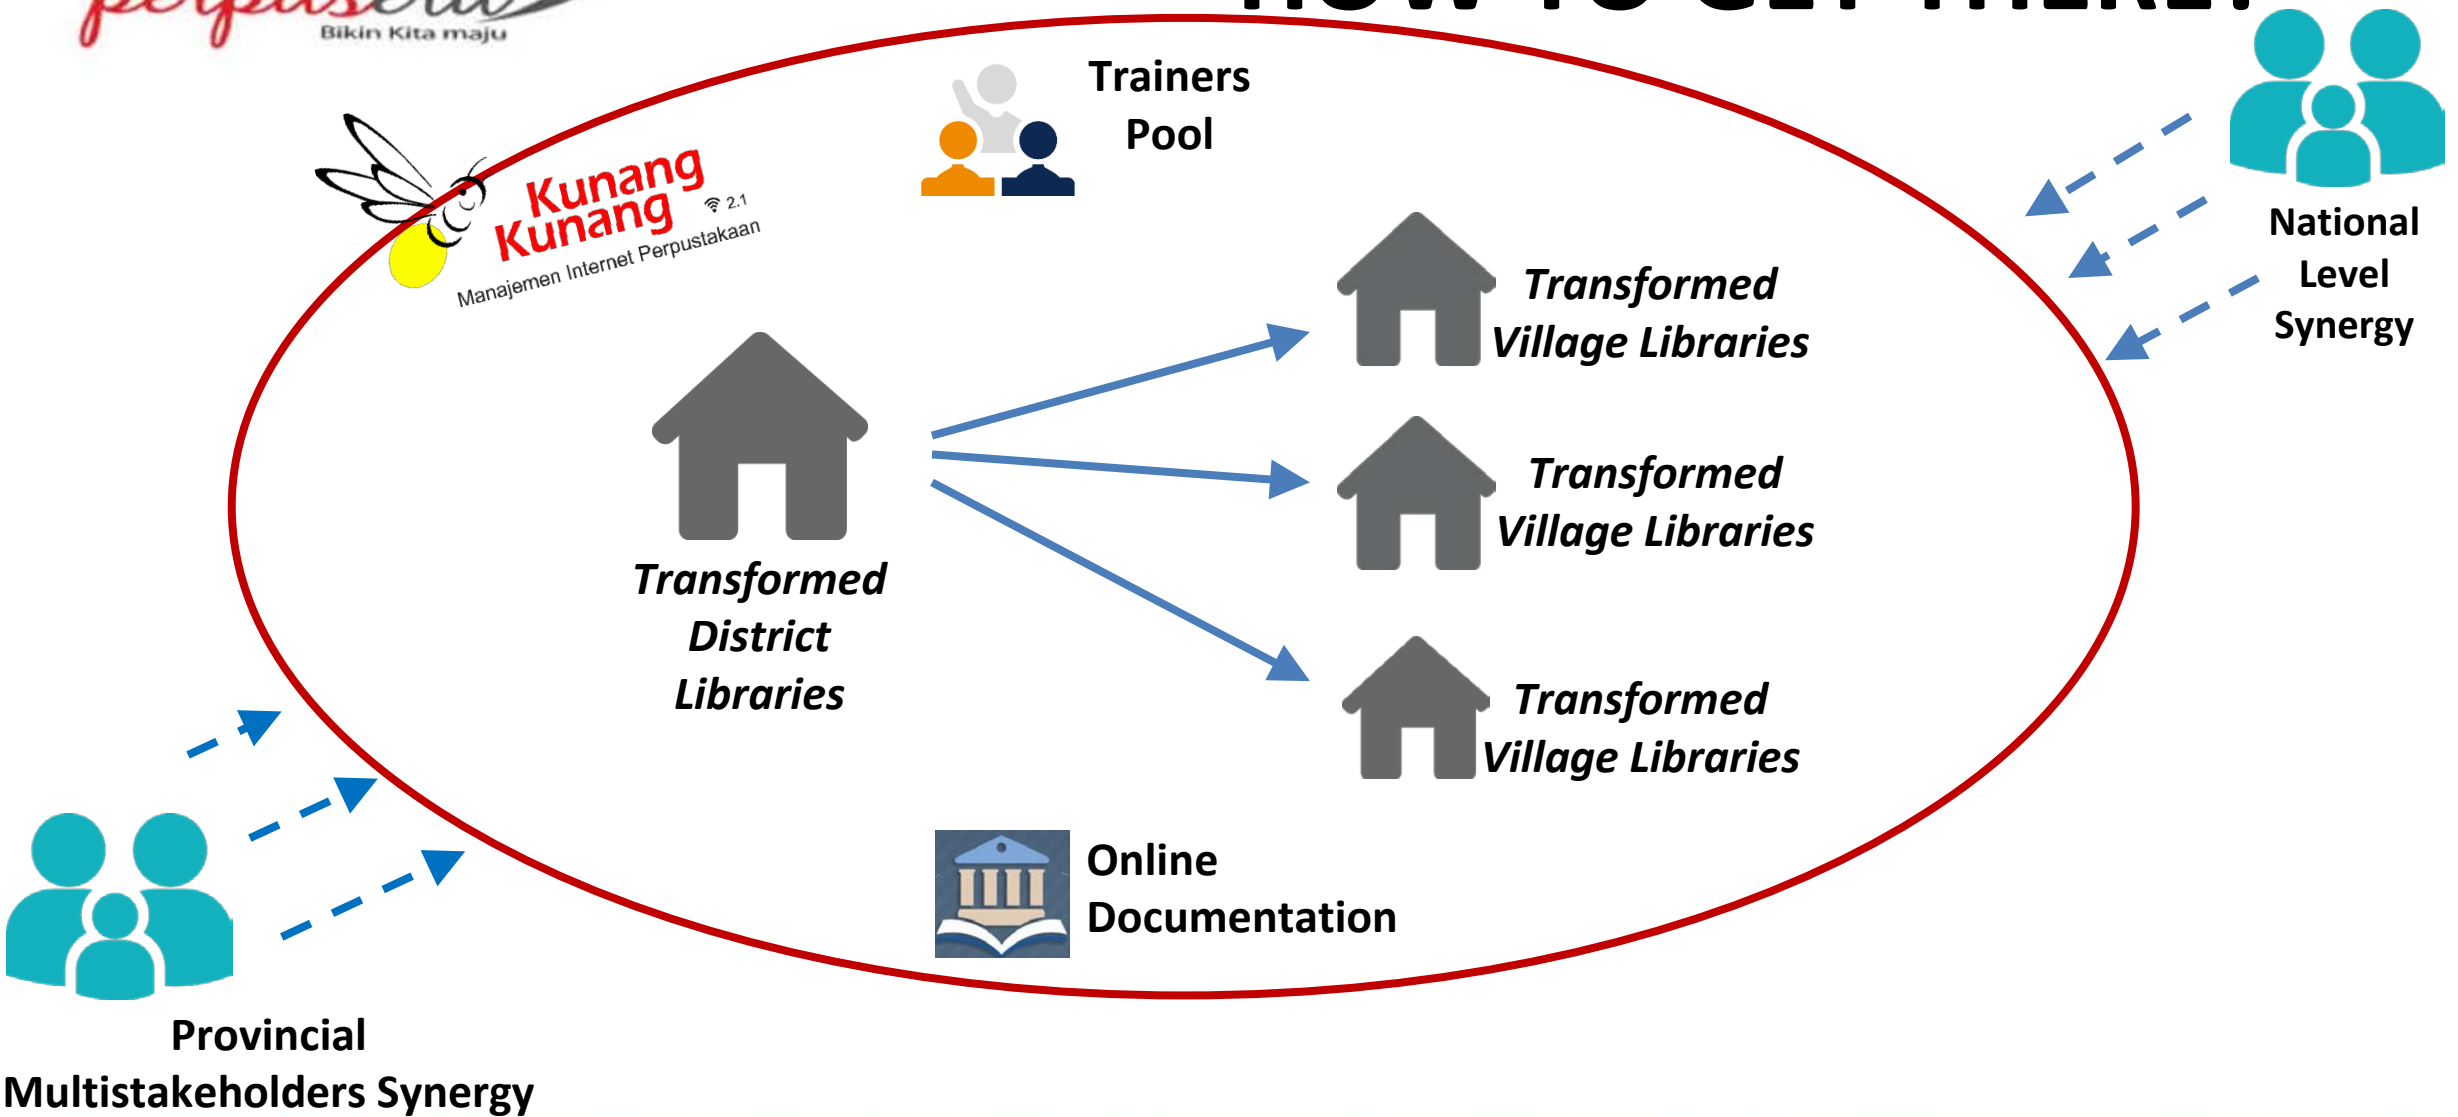

# Goal and Objectives

**GOAL :** To reduce information poverty and improve community education, health, and economic development outcomes in Indonesia by transforming district and village libraries into information-rich centers of learning that meet their communities needs through improved access to technology and relevant services

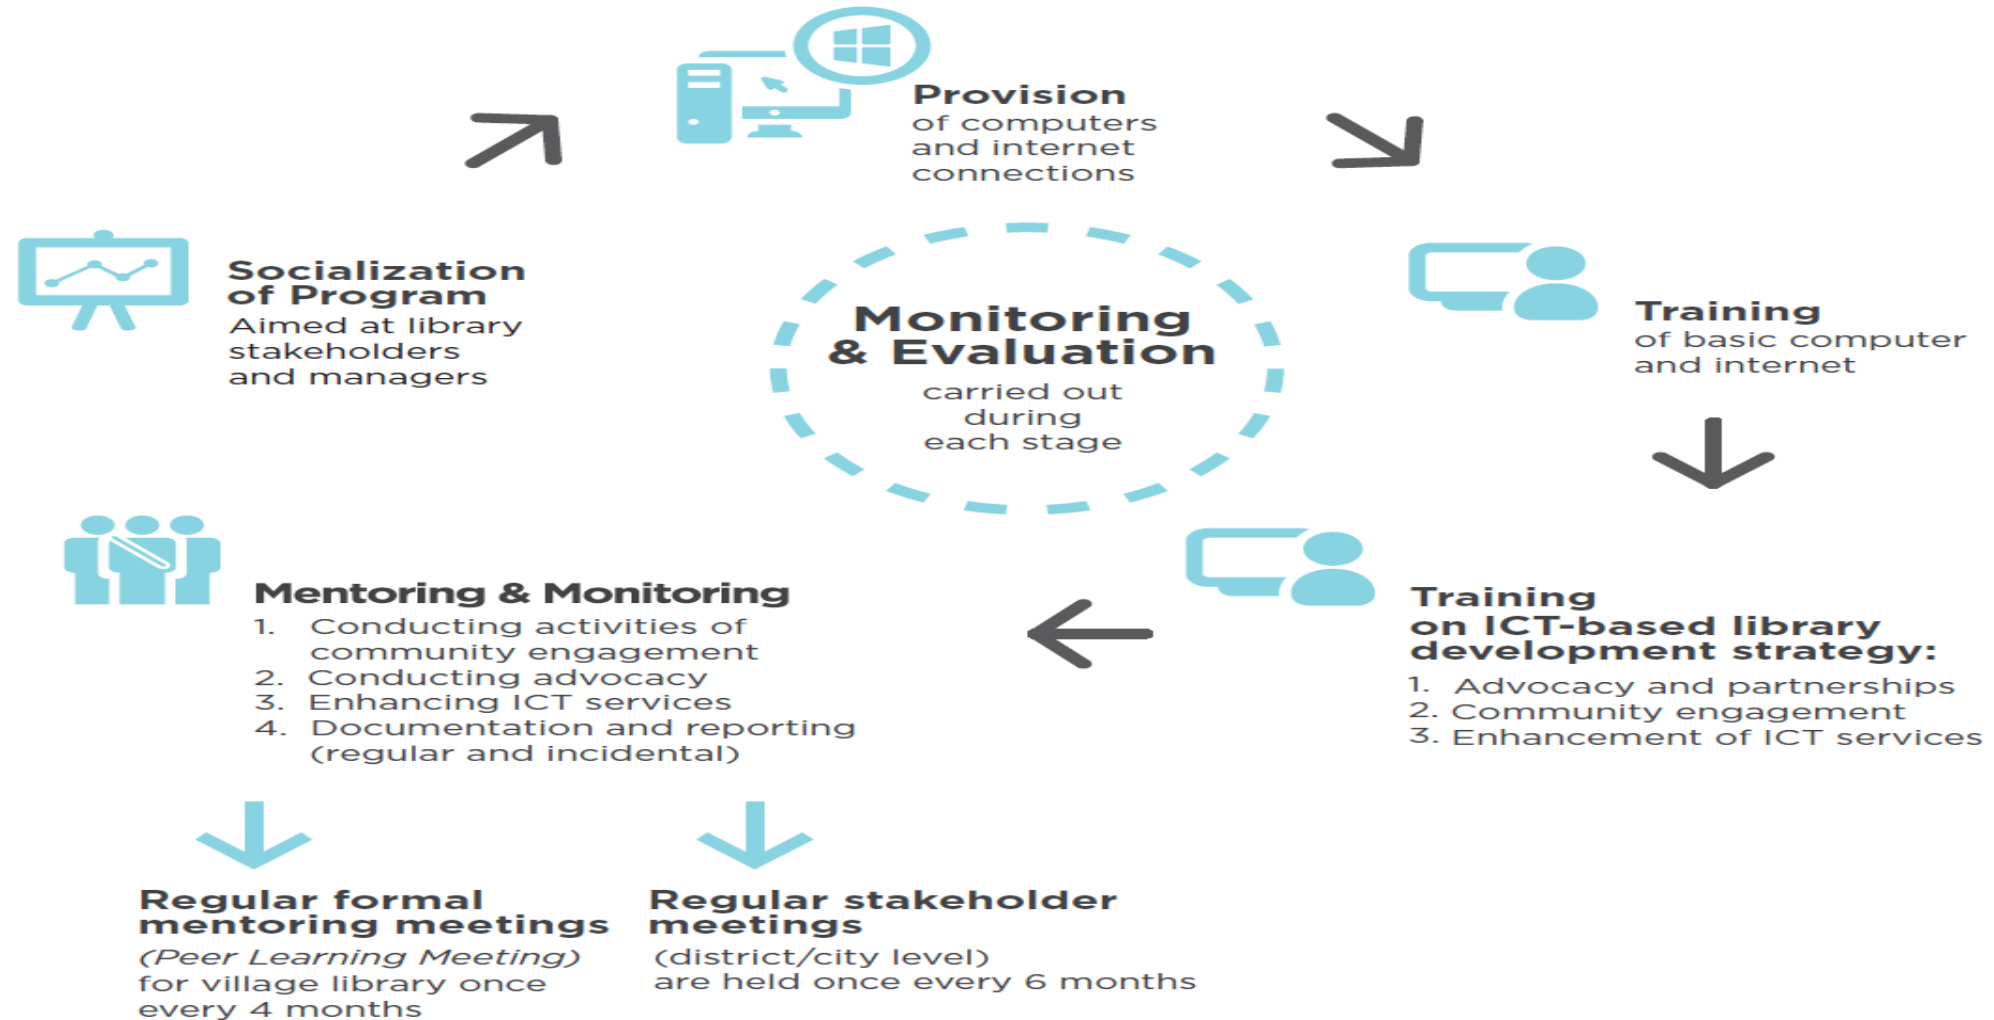

**Objectives :**

1. Libraries have contributed to "information poor" reduction by providing free internet access to the community
2. Improved utilization of library services by community resulting on improved quality of life
3. Sustained support for library development from government and non-government stakeholders
